

discuss on various civil engineering topics that introduced each country's perspectives on international cooperation aiming for the future, and preparation of overseas expansion of construction industry. Four presentations were made from representatives of CICHE, ICE, JSCE, and KSCE. About twenty renowned engineers from Canada, Japan, Kuwait, Mongolia, Taiwan, and United Kingdom participated in the active discussion.

The topic for the ISM was "International Students in Civil Engineering and Adapting in Korea after Graduation". Welcoming the 4th year of the ISM, the primary objective of the meetings was to form a network between international students and graduates, which will help maximize effective education in Korea and adapting to the Korean society after graduation.

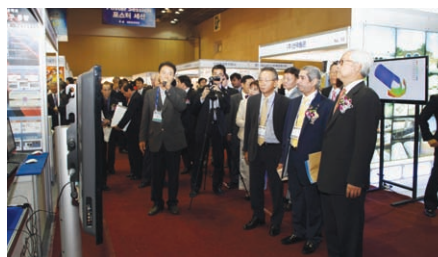

The 38th KSCE Annual Conference in 2012 is scheduled to be held on October 25-27, 2012, at Chonnam National University, Gwangju, Korea.

KSCE Upcoming Events

The 60th Annual Meeting

Date: Monday, January 16, 2012

Venue: International Conference Rm., 2ndFl. Construction Guarantee Center, Seoul, Korea

15th Civil Engineers Day (2012)

Date: Friday, March 30, 2012

Venue: International Conference Rm., 2ndFl. Construction Guarantee Center, Seoul, Korea

38th KSCE Annual Conference

Date: Thursday-Saturday, October 25-27, 2012

Venue: Chonnam National University, Gwangju, Korea

2011 AOC Societies' Events & Conferences

ACECC 20th and 21st Executive Committee Meeting(ECM)

The 20th ECM was held on February 10-11, 2011, at Borobudur Hotel, Jakarta, Indonesia. The meeting was organized by the Asian Civil Engineering Coordinating Council(ACECC) and sponsored by the HAKI. About 45 individuals from all ACECC member countries except for VFCEA(Vietnam) have participated in the meeting. KSCE Vice President, Prof. Jong Seh Lee(Hanyang University), KSCE Chair for ACECC, Dr. Moonkyung Chung(Korea Institute of Construction & Technology), KSCE Executive Director, Mr. Choong-Soo Lim participated in the meeting. At the meeting, a Taskforce of 10 members was formed to determine the options for a permanent Secretariat of ACECC, and to report to the ECM by no later than December 2011. Action plans to

increase the ACECC member organizations were also discussed.

The 21st ECM was held on September 16-17, 2011, at the Leela Kempenski Hotel, New Delhi, India. The meeting was organized by the ACECC and sponsored by the ICE, India. KSCE President, Prof. Tai Sik Lee(Hanyang University), KSCE Chair for ACECC, Dr. Moonkyung Chung(Korea Institute of Construction & Technology), Prof. Sang Ho Lee(Yonsei University), Prof. Seokwon Lee(Konkuk University), and Mr. Saumya Ranjan Swain(Daelim Co., Ltd.) participated in the meeting. At the meeting, Mr. Swain made his presentation for TC9 on "Infrastructure Report Card" at the Technical Coordinating Committee Meeting. TC 13 on "BIM" was newly formed by KSCE and CICHE, and Prof. Lee has made his presentation on "IFC Infrastructure & BIM-based Asset Management of Infrastructure".

Presentations of bids to host the 7th CECAR was made and ASCE was unanimously selected to host the 7th CECAR in June 2016, at Hawaii, USA. The 22nd ECM will be

•• KSCE Representatives for 21st ECM

hosted by the JSCE in Tokyo, Japan in March 1-2, 2012.

The 2011 CSCE Annual General Meeting and Conference

The 2011 CSCE Annual General Meeting and Conference was held on June 14-17, 2011, at the Westin Ottawa, Ontario, Canada. The CSCE(Canadian Society of Civil Engineers) and KSCE signed the AOC in 2005. Since then, the two societies have made exchanges of international activities, and shared much knowledge and information in the field of civil engineering. The theme for this year's conference was "Engineers-Advocates for Future Policy". KSCE President, Prof. Tai Sik Lee(Hanyang University) participated in this year's meeting, and shared valuable knowledge in shaping national and international policies as civil engineers.

The 2011 JSCE Annual Meeting

The 66th JSCE 2011 Annual Meeting was held during September 7-8, 2011, at Ehime University, Matsuyama City, Japan. Immediate Past President, Prof. Kyung Soo Chon(Seoul National University), International Affairs Committee Chair, Prof. Jae-Woo Park(Hanyang University), Executive Director, Choong-Soo Lim attended the meeting. The meeting venue, Ehime University, has been established in 1949, and currently has a total number of 8,400 undergraduates in 4 campuses. The meeting was held in the main campus, Johoku Campus in Matsuyama City. Early September was still a part of summer vacation in Japan's universities, which made it possible for the annual meeting to take

•• KSCE Delegation at the JSCE IRM

place inside the Johoku Campus. The international roundtable meeting was held under the theme, "Public-Private-Partnership (PPP) Policy, Guidelines, and Project Implementation." Representatives from each society took interest in our experiences in BTL, BTO Project, and asked many questions on our policies. During the discussion, Prof. Kyung Soo Chon gave detailed explanations on the Incheon Bridge, which was already well known to the participants, as one of the successful PPP Project in Korea. Participating countries were Nepal, Mongolia, Philippine, Taiwan, USA and Korea. Prof. Jae-Woo Park, KSCE International Affairs Committee Chair, made his presentation on "PPP Projects in Korea". At the welcome reception, Prof. Chon, KSCE Immediate Past President, gave a congratulatory speech, wishing for a great success of the JSCE Annual Meeting.

The 141st ASCE Annual Conference

The 141st ASCE Annual Conference was held on October 18-22, 2011, at Memphis Marriott Downtown, Memphis, Tennessee, USA. The theme of this year's conference was "Sustainable Infrastructure-Civil Engineering Solutions". KSCE President, Prof. Tai Sik Lee(Hanyang University) and International

Affairs Committee Chair, Prof. Jae-Woo Park(Hanyang University) participated in the conference. KSCE Representatives have participated in the International Roundtable Meeting and various other programs. There were also various presentations and events related to Sustainability and Disaster. Especially, the effort to give greater focus on sustainability through the Institute for Sustainable Infrastructure was impressive. It was worth benchmarking, considering the reality of our state where "Sustainability" becomes no more than just a terminology that becomes part of a slogan or a motto. For reference, detailed information of the program is available at <http://www.asce.org/sustainability>.

Another focus was on "Disaster." There were various presentations on the analysis and research on disaster. A special session organized to invite distinguished scholars from Japan to present and discuss on the recent Tsunami that devastated parts of Japan drew the attention of many participants. Also, the ASCE was putting in efforts to spread knowledge and information on the deterioration of infrastructure in the USA that causes financial burden, which is also predicted to get more intense in the near future. There were different measures proposed to solve the problem. Since it is also an unavoidable problem in Korea, the presentations and proposals were very informative.
